Celox™ can stop even potentially lethal bleeding fast. It is easy to use (just pour, pack and apply pressure), very safe (tested to class 3 CE Mark standards) and extremely effective. Celox™ saves lives.

When mixed with blood, Celox™ forms a robust gel like clot in 30 seconds. It works independently of the body’s normal clotting processes. Celox’s™ clotting ability has been proven to work in the cold (hypothermia) or in the presence of common anti-coagulants such as warfarin. It generates no heat and will not burn the casualty or care giver. In clinical tests by the US Navy, Celox™ was the only product to give 100% survival. It gave a strong stable MAP (mean arterial blood pressure) and was also the only product to give robust clotting without rebleeding**. Celox’s™ safety has been tested to the intense class 3 CE mark standards. Celox™ is made with chitosan. Chitosan is broken down by lysozyme, a human enzyme, to leave glucosamine, a sugar which is normally found in the body***.
